## About us

Taylor Wessing is a leading International law firm with a single-minded approach: to help our clients succeed.

What makes us different is our forward thinking approach to serving clients. We think creatively about business issues and are constantly looking for new and better ways to add value with truly innovative solutions that help to grow our clients' businesses.

By keeping close to our clients we can proactively identify better ways to help them achieve their ambitions.

Today's world is undergoing fundamental change and that creates the need for intelligent solutions.

Our aim is to be at the forefront of developing those solutions by serving clients in the sectors that we believe are the industries of tomorrow:

- Technology, Communications and Brands;
- Life Sciences and Healthcare;
- Real Estate and Infrastructure;
- Energy and Environment;
- Financial Institutions and Services.

With over 750 lawyers in the UK, Germany, France and Belgium, we are able to provide unrivalled support for commercial organisations doing business in Europe across a full range of legal practice areas. We are also strong in the Middle East, India, China and North America. We are driven by where the industries of tomorrow are growing the fastest.

The firm's Life Sciences and Healthcare group is top ranked for patent litigation, corporate, venture capital and licensing work, in addition to having strong healthcare infrastructure and services expertise. Because we act for clients across the full industry-wide spectrum from biotechnology to healthcare, we are able to spot emerging trends and see the bigger picture.

With 35 patent law specialists, our patent litigation team is one of the strongest and best known in Europe. This means we have extensive experience of co-ordinating highly technical parallel actions in multiple jurisdictions and are able to develop innovative strategies, specifically designed to manage such complex litigation.

Many organisations are looking to deliver healthcare services in new markets around the world, resulting in a number of joint ventures and strategic alliances. Our in-depth expertise and international reach enables us to excel in devising innovative forms of funding and contract structures that are highly successful for our clients.

The work of our healthcare specialists includes all aspects of transactions for the design, construction and maintenance of new and existing healthcare infrastructure. We advise public authorities, investors, developers and financiers of major hospitals, as well as specialist equipment providers and clinical and non-clinical service providers.

“ Life Sciences UK-wide - recommended for client service and commercial awareness ”  
*Chambers 2010*

“ Shortlisted for the Life Sciences IP Firm of the Year Award 2010 ”  
*Managing Intellectual Property Europe Awards 2010*
