

# Projects, Energy & Infrastructure

## Offshore Wind

Taylor Wessing's Projects, Energy & Infrastructure team is one of the leading practices for plant construction in the market and has been advising the offshore wind industry from its very beginning. Starting back in the early 2000s with Germany's first commercial offshore wind farm alpha ventus, we have advised in connection with more than twenty international offshore wind projects including, inter alia, their early development, the drafting and negotiation of the relevant project agreements, and throughout their construction and operational phase including claims management.

- Contract Drafting and Negotiation

- Regulatory Advise

- Banking and Finance

- Labour Law and HSE Requirements

- Tax and Customs

- IP and Cybersecurity

- Operational Advise

- Claims Management and Disputes

- Project Due Diligences

- Preferred Supplier Agreements
- Offshore Survey and Clearance Campaign Agreements
- Turbine Supply and Installation Agreements
- Foundation Supply and Installation Agreements
- Inter-Array Cable Supply and Installation Agreements
- Export Cable Supply and Installation Agreements
- Offshore Substation Supply and Installation Agreements
- Grid Connection Agreements
- Power Purchase Agreements (PPAs)
- Offshore Installation Vessel Charter Parties
- Offshore Support Vessel Charter Parties
- Service and Maintenance Agreements
- Bank Bonds and Parent Company Guarantees
- Facility and Intercreditor Agreements
- Direct Agreements
- Decommissioning and Recycling Agreements
