

Energy & Infrastructure

Renewable Energy

Taylor Wessing's Renewable Energy Practice is part of the international Energy & Infrastructure industry group that counts more than 50 experts in 17 locations and 29 offices. We have been active in the field of corporate/M&A and financing of renewables for over 15 years which has given us extensive legal and commercial expertise as well as in depth market knowledge. Our team in Germany alone has advised on a significant number of transactions in the field of renewables, in particular on solar PV and onshore wind. In addition we have extensive experience in offshore wind having advised on more than 20 offshore projects in Europe and internationally.

Our clients include funds and corporate venture investors, project developers, plant manufacturers, and banks and we provide full service on the development, operation, acquisition, disposal, and financing of renewable energy assets.
