

Carbonology® Ltd. ISO 14064-3 Verification Statement

It is the opinion of Carbonology® Ltd. that Taylor Wessing LLP have correctly applied the principles of ISO 14064-1 in the quantification and reporting of organisational emissions from its operations.

An effective system for the collection and quantification of activity data has been evidenced. Taylor Wessing LLP have accurately and transparently quantified organisational emissions.

GHG quantification and reporting has been completed in alignment with ISO 14064-1. Verification has been completed to a limited level of assurance following the requirements of ISO 14064-3.

Based on the process and procedures conducted by Carbonology® Ltd., there is no evidence that the GHG information:

- is not materially correct and is not a fair representation of GHG data and information;
- has not been prepared in accordance with the related International Standard on GHG quantification, monitoring, and reporting, or to relevant national standards or practices.

Verification for the period 1st May 2024 – 30th April 2025 covers the following Scopes and results:
